

Turn your iPhone into a cinema projector with the new i20 Mobile Cinema from Aiptek

Willich, 27 February 2012. A cinema in your jacket pocket. Owners of 3GS, 4 or 4S Apple iPhones can now use the brand new i20 MobileCinema to project their films and photos onto walls and ceilings anywhere. The compact, wireless pico projector simply connects onto the iPhone to project all kinds of media in dark rooms. The image diagonal is up to 125 cm or 50 inches. The i20 Mobile Cinema costs 149 euros and will be available in the shops as of May.

It means you can use your iPhone as a cinema projector. You can also project the internet onto any wall, which gives a whole new dimension to web surfing. The built-in battery can also be used to charge the iPhone. This makes the i20 Mobile Cinema not only an ultra-compact projector, but also a high-performance battery pack.

The high resolution of 960 x 540 pixels (Q-1080p) matches that of the iPhone and means that even smaller content can be display in detail. An energy-saving LED is used as the light source and can last up to 20,000 hours. That is equivalent to a service life of 11 years if used for 5 hours a day. Despite packing in all this technology, this fan-free little miracle weighs just 78 g is and is half the size of the iPhone itself at just 60 mm x 47 mm x 18 mm.

Of course, the i20 Mobile Cinema can also be connect to an iPad or iPad 2 to enjoy YouTube videos in small groups or show off your latest holiday photos to your friends.

Features:

- Wireless, Plug & Play
- Modern energy-saving RGB LED with service life of up to 20,000 hours
- Projects images with diagonals of up to 125 cm (50 ")

- Q-1080p (960 x 540) resolution with 16:9 page ratio

- Built-in rechargeable battery for projection or charging the iPhone
- Special app for photo/video display, internet or live view
- For iPhone 3GS, iPhone iPhone 4 and 4S
- Supports iPad and iPad 2
- Fan-free design

About Aiptek

Aiptek International (Advanced Intelligent Personal Technologies) was founded in 1997 in Taiwan. The company produces and distributes 3D products, camcorders, pico projectors, digital photo frames, graphics tablets, digital styluses and cameras. The German and European office was opened in 1999 in Willich near Düsseldorf, from where all European sales are coordinated. There are also branches in Shanghai and the USA. The legendary Pen Cam with which Aiptek started out in 2000 had sold over 2.5 million within a short space of time. Aiptek 3D products represent innovative technologies for price-conscious customers.
